Breast Cancer Screening (BCS-E)		
 Women and people with female sex assigned at birth who have not undergone chest reconstruction who are 50–74 years of age who had at least one mammogram to screen for breast cancer in the past two years Exclusions: Bilateral mastectomy Unilateral mastectomy with bilateral modifier History of gender-affirming chest surgery (CPT 19318) with diagnosis of gender dysphoria 	 PCP Responsibilities: Document date of patient's last mammogram Order mammograms as part of preventative care visits Follow up to ensure completion of ordered screenings and obtain copies of the results in the medical record Conduct outreach to close care gaps for breast cancer screening HEDIS-acceptable forms of mammography: diagnostic, film, digital, or digital tomosynthesis MRIs, ultrasounds, and biopsies DO NOT count toward HEDIS compliance. Explicitly document member's gender in the medical record Document and code exclusions found in the member's history or on exam 	Key Screening Codes: <u>CPT:</u> 77061-77063, 77065-77067 Key Exclusion Codes: <u>ICD10CM:</u> 0HTV0ZZ, Z90.13
Cervical Cancer Screening (CCS-E) Women or individuals with a cervix 21–64 years	PCP Responsibilities:	Key Screening Codes:
 of age who were recommended for routine cervical cancer screening and were who were screened for cervical cancer using any of the following criteria: Cervical cytology performed within the last 3 years (ages 21-64) Cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years (ages 30-64) Cervical cytology high-risk human papillomavirus (hrHPV) co-testing within the last 5 years (ages 30-64) Exclusions: Hysterectomy with no residual cervix, cervical agenesis, or acquired absence of cervix Male sex assigned at birth 	 Document date and result of patient's last cervical screening Complete screening if service offered in PCP office or refer to OB/GYN for screening. Follow up to ensure completion of visit from referral. Obtain a copy of results for the medical record. Conduct outreach to close care gaps for cervical cancer screening Lab results that explicitly state sample was inadequate or "no cervical cells were present" DO NOT meet HEDIS criteria Explicitly document member's gender in the medical record Document and code exclusions found in the member's history or on exam "Complete," "total," or "radical" hysterectomy "hysterectomy" + patient no longer needs cervical cancer screening 	<u>CPT:</u> 88141-88143, 88147-88148, 88150, 88152-88153, 88164-88167, 88174-88175 <u>HCPCS:</u> G0123, G0124, G0141, G0143-G0145, G0147, G0148, P3000, P3001 Q0091 Key Exclusion Codes: <u>ICD10CM:</u> Z90.710
Colorectal Cancer Screening (COL-E)		
Members 45–75 years of age who had appropriate screening for colorectal cancer <i>Exclusions:</i> • History of colorectal cancer • History of total colectomy	 PCP Responsibilities: Document date of patient's last colorectal cancer screening Order one of the following as part of preventative care visit: Annually: Fecal Immunochemical Test (FIT) or guaiac (gFOBT) Every 3 years: Stool FIT-DNA test (Cologuard) Every 5 years: Flexible sigmoidoscopy Every 10 years: Colonoscopy Follow up to ensure completion of visit from referral. Obtain a copy of results for the medical record. Conduct outreach to close care gaps for colorectal cancer screening Document and code exclusions found in the member's history or on exam 	Key Screening Codes: FIT/gFOBT – Annually • <u>CPT</u> : 82270, 82274 • <u>HCPCS</u> : G0328 sFIT-DNA Cologuard – every 3 years • <u>CPT</u> : 81528 • <u>LOINC</u> : 77353-1, 77354-9 Flex Sig – every 5 years • <u>CPT</u> : 45330-45335, 45337-45338, 45340- 45342, 45346-45347, 45349-45350 • <u>HCPCS</u> : G0104 CT Colonography – every 5 years • <u>CPT</u> : 74621-74623 Colonoscopy – every 10 years • <u>CPT</u> : 44388-44392, 44394, 44401-44408, 45378-45382, 45384-45386, 45388-45393, 45398

HEDIS® Provider Reference Guide

		HCPCS: G0105 (high risk), G0121 (normal		
		risk)		
		Key Exclusion Codes: ICD10CM: Z85.038, Z85.048, C18-C21		
Controlling High Blood Pressure (CBP) and Blood Pressure Control for Patients with Hypertension (BPC-E)				
Adults 18–85 years of age who had a diagnosis	PCP Responsibilities:	Key CPTII Codes:		
of hypertension and whose most recent blood	 Document the patient's blood pressure at each visit 	3074F: Systolic <130 mm Hg		
pressure during the measurement period was	• If patient's blood pressure is uncontrolled upon arrival, recheck the	3075F: Systolic 130-139 mm Hg		
adequately controlled (<140/ <90 mm Hg)	blood pressure before the patient leaves the clinic	3077F: Systolic ≥140 mm Hg		
	Document all blood pressure readings, including if taken multiple	3078F: Diastolic <80 mm Hg 3079F: Diastolic 80-89 mm Hg		
	times during a visitUtilize CPTII codes on claims to indicate blood pressure values	$3080F$: Diastolic $\ge 90 \text{ mm Hg}$		
Eye Exam for Patients with Diabetes (EED)		-		
Members 18–75 years of age with diabetes	PCP Responsibilities:	Key <u>CPTII</u> Codes:		
(types 1 and 2) who had a retinal eye exam	 Annual screening recommended for all diabetics 	Eye Exam with Evidence of Retinopathy:		
	Complete retinal imaging in primary care setting with images sent	2022F, 2024F, 2026F		
HEDIS compliance:	to eye specialist for interpretation. Maintain documentation in	Eye Exam <u>without</u> Evidence of Retinopathy:		
 Annual exam including clearly documented positive or negative retinopathy 	chart.	2023F, 2025F 2033F		
 Exam every other year if "no retinopathy" is 	 Refer member to Ophthalmologist or Optometrist Follow up to ensure completion of visit from referral. Obtain a copy 			
clearly documented.	of results for the medical record.			
	Conduct outreach to close care gaps for diabetic eye exams			
	• Maintain communications from eye care provider in the PCP chart.			
Glycemic Status Assessment for Patients with	th Diabetes (GSD)			
Members 18-75 years of age with diabetes	PCP Responsibilities:	Key <u>CPTII</u> Codes:		
(types 1 and 2) whose most recent glycemic status (A1c) or glucose management indicator	Document date and result of patient's last HbA1c test	3044F: HbA1c <7.0 3051F: HbA1c ≥7.0 & <8.0		
(GMI) is at the following levels:	Document date ranges of continuous glucose monitoring used to derive the value	$3051F$: HbA1c \geq 7.0 & <8.0 $3052F$: HbA1c \geq 8.0 & \leq 9.0		
 Glycemic Status Controlled <8.0% 	 If test was completed with a different provider, note date and test 	3046F: HbA1c >9.0		
Glycemic Status Poorly Control >9.0%	results in chart			
	Order HbA1c lab test as part of diabetic care visit. Results required			
	for HEDIS compliance.			
	Utilize CPTII codes on claims to indicate lab result values			
Well Child Visits (W30 and WCV)		Kar Carrow day Carlos		
Well Child Visits in the First 15 Months (W30) The percentage of children who:	 PCP Responsibilities: Follow AAP's Schedule of Well-Child Visits 	<i>Key Screening Codes:</i> ICD10CM: Z00.00, Z00.01, Z00.110, Z00.111,		
 turn 15 months old during the year who 	 Create appointment reminders for subsequent well child visits at 	Z00.121, Z00.129, Z00.2, Z00.3, Z02.5, Z76.1,		
have six or more well child visits with a PCP	the time of the current visit	or Z76.2		
by 15 months of age		CDT 00204 00205 00204 00205 00464

Measurement Year 2025

HEDIS® Provider Reference Guide

 ★ Goal is to reduce number of images Exclusions: Completing diagnoses such as cancer, recent trauma, IV drug abuse, neurological impairment, HIV, spinal infection, major organ transplant, prolonged use of corticosteroids, osteoporosis, frailty fracture, lumbar surgery, or spondylopathy 	 Determine if patient had a previous encounter (outpatient, obs, ED, chiropractor, PT, telehealth) with a primary diagnosis of uncomplicated low back pain If so, confirm at least 28 days has passed since the earliest of the above visit before ordering an imaging study, if medically necessary Encourage comfort measures, as well as use of anti-inflammatories if appropriate for the patient 	
Depression Screening and Follow-Up for Add	plescents and Adults (DSE-E)	
The percentage of members 12 years of age and older who were screened for clinical depression using a standardized screening instrument, and if screened positive, received follow up care.	 PCP Responsibilities: Screen patients at least annually for depression using a standardized tool: PHQ-2, PHQ-9, BDI-FS, BDI-II, EPDS, PROMIS, CESD-R, DUKE-AD, GDS long or short form, M-3, or CUDOS. Maintain depression screening documentation and build LOINC codes into the EMR Provide follow up care on or within 30 days of the positive screen: Outpatient, telephone, e-visit, or virtual check in Depression Case Management encounter Behavioral health encounter A dispensed antidepressant medication Note: CPT 96127 does <u>not</u> meet HEDIS criteria 	Key LOINC Codes: PHQ-2: 55758-7 PHQ-9: 44261-6 PHQ-9M: 89204-2 BDI-FS: 89208-3 BDI-II: 89209-1 EPDS: 71354-5 PROMIS:71965-8 CESD-R: 89205-9 DUKE-AD:90853-3 GDS Long: 48544-1 GDS Short: 48545-8 M-3: 71777-7
		CUDOS: 90221-3
Social Need Screening and Intervention (SNS		
The percentage of members who were screened, using prespecified instruments, at least once during the year for unmet food, housing, and transportation needs, and received a corresponding intervention within 1 month if they screened positive.	 PCP Responsibilities: Screen patients at least annually for food, housing, and transportation needs using one of the following instruments: Food: AHC HRSN screening tool, AAFP SNS Tool, Health Leads Screening Panel, HVS, PRAPARE, SEEK, U.S. FSS, We Care Survey, WellRx Questionnaire Housing: ACH HRSN screening tool, AAFP SNS Tool, Children's Health Watch Housing Stability Vital Signs, Health Leads Screening Panel, PRAPARE, We Care Survey, WellRx Questionnaire, NCHC Transportation: ACH HRSN screening tool, AAFP SNS Tool, CUBS, Health Leads Screening Panel, IFR-PIA, OASIS, PRAPARE, PROMIS, WellRx Maintain SDoH screening documentation and build LOINC codes into the EMR. Provide intervention corresponding to the type of need identified on or up to 30 days after the date of the first positive screening. Intervention may include assistance, assessment, counseling, coordination, education, evaluation of eligibility, provision, or referral. 	Key Screening Tool LOINC Codes: ACH HRSN: 88122-7, 88123-5, 71802-3, 96778-6, 93030-5 AAFP SNS: 88122-7, 88123-5, 99550-6, 71802-3, 96778-6, 99594-4 Health Leads Screening Panel: 95251-5, 99550-6, 99553-0 HVS: 88124-3 PRAPARE: 93031-3, 93033-9, 71802-3, 93030-5 SEEK: 95400-8, 95399-2 U.S. FSS: 95264-8 We Care Survey: 96434-6, 96441-1 WellRx: 93668-2, 93669-0, 93671-6 Children's Health Watch Housing Stability Vital Signs: 98976-4, 98977-2, 98978-0 CUBS: 89569-8 PROMIS 92358-1 NCHC:99134-9, 99135-6 IRF-PIA: 93030-5 OASIS: 93030-5

Exclusions that apply to all measures:

- Hospice
- Death during the measurement period
- Members 66 years of age and older with both frailty and advanced illness
- Members who had an encounter for or are receiving palliative care

Key screening codes presented in this document are not a comprehensive list. Numerous codes from multiple code systems are accepted by NCQA. Please contact the HEDIS team for questions about specific codes that meet HEDIS criteria.
